## Professional Summary

Full-Stack Software Engineer (B.Tech CSE, 2025) with 1+ year building scalable, **cloud-native applications** using **Java, Spring Boot, Python, Go, and React**. Proficient in **distributed systems, microservices, and enterprise platforms** on **AWS and Kubernetes** — with hands-on **DevOps, CI/CD, Docker, Infrastructure as Code, and observability** experience. Proven track record architecting resilient, highly available backend services and integrating **AI/LLM and MCP** technologies into production workflows. Self-starter in fast-paced environments. Eligible for Early Careers roles (2025 graduate).

## Education

### Bachelor of Technology in Computer Science Engineering

Shri G. S. Institute of Technology and Science, Indore, India

Dec 2021 – June 2025

*Relevant Coursework:* Data Structures & Algorithms, OOP, Operating Systems (process scheduling & memory management in C), Web Development, Machine Learning, AI, Agile Software Development, Android Development.

## Experience

### Software Engineer

Ascentt AI Tek Pvt. Ltd., Indore

May 2025 – Present

- Engineered **AI-powered backend services** using **FastAPI, PostgreSQL, and LLM/MCP architectures**, automating multi-step business workflows and exposing clean REST API contracts across **5–6 enterprise modules of Orbis** — cutting workflow turnaround time and reducing manual process overhead.
- Designed and maintained **scalable backend APIs, data models, and reusable React/Next.js components** across project management, resource planning, timesheet, contract management, and workflow automation — collaborating within an **Agile sprint workflow** including planning, code reviews, and retrospectives.
- Contributed to **unit testing, debugging, and production incident resolution** for AWS-deployed services, working with the infrastructure team to eliminate performance bottlenecks and reduce recurring incident rates.
- Participated in **architecture reviews and system design** with senior engineers to define service boundaries, API contracts, data access patterns, and **resilient, highly available** backend service designs.
- Collaborated on **AWS deployments, CI/CD pipelines, infrastructure monitoring, and observability** using Grafana — ensuring reliability, scalability, and production infrastructure maintainability.

### Trainee Engineer

Ascentt AI Tek Pvt. Ltd., Indore

Feb 2025 – May 2025

- Contributed production-ready backend API integrations and **React/Next.js** UI components for Ascentt's **Agent AI platform**, ramping to first merged PR within the initial sprint cycle.
- Improved codebase maintainability through **code review participation and Agile delivery practices**, building reusable components and integrating backend APIs with attention to performance optimization.

## Projects

### Sencoline E-commerce Website | [WEBSITE](#)

Feb 2025 – Present

- Architected a **production Java/Spring Boot backend** for a UAE-based B2B trading company, handling **hundreds of SKUs**, quotation workflows, and orders with **multithreaded processing, Hibernate/JPA, database migrations, and advanced search** on PostgreSQL.
- Reduced API response latency by **~40–50%** by implementing **Redis caching** and optimizing ORM-based data access layers; deployed and monitored the full platform on a **VPS with Grafana** observability dashboards.
- Integrated an **MCP server** for AI-driven backend automation; built **SSR-powered Next.js frontend** with reusable components and role-based admin tooling — end-to-end ownership from database schema to production deployment.
- Tech:** Spring Boot, Java, Hibernate/JPA, PostgreSQL, Redis, Next.js, React.js, TypeScript, MCP, Grafana, VPS

### FirstOx Studio: An AI-powered media generation platform | [WEBSITE](#)

Feb 2025 – Feb 2026

- Built and deployed a **cloud-native backend on AWS ECS** powering AI media generation with user management, generation history, and analytics — using **GitHub Actions CI/CD** for automated testing and deployment pipelines.
- Tech:** AWS ECS, Next.JS, React.JS, TypeScript, NestJS, MongoDB, GitHub Actions, Figma

## Technical Skills

- Programming Languages:** Java, Python, TypeScript/JavaScript, GoLang, SQL, C/C++ (academic), HTML, CSS
- Backend Development:** Spring Boot, FastAPI, NestJS, Go, Microservices, REST APIs, Kafka, PostgreSQL, MongoDB, Redis, Firebase, Hibernate/JPA
- Web & App Development:** NextJS/ReactJS, Redux, TanStack Query, Flutter, ElectronJS, Vite, Figma
- Testing & Quality:** Unit Testing (Jest, JUnit), Debugging, Code Reviews, Agile/Scrum (sprint planning, standups, retrospectives)
- Cloud, DevOps & AI:** AWS (ECS, EC2, Lambda, S3, Beanstalk), Docker, Kubernetes, Ansible, Jenkins, GitHub Actions, Grafana, Linux, MCP, Spring AI, Claude, GitHub Copilot
- Developer Tools:** Git, GitHub, Postman, Maven, Gradle, VS Code, PyCharm, Android Studio, Jira, Webpack

## Leadership/Extracurricular Activities

### Entrepreneurship Cell, SGSITS – Head of Web Development

2023 – 2024

- Led development of E-Cell SGSITS official website and coordinated the E-SUMMIT event across a cross-functional student team.

### Indhan Paygate Pvt. Ltd., SIF – UI/UX Designer

2022 – 2023

- Designed complete UI/UX for the IndhanPay mobile app including full branding and marketing design assets.
